DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1,6,8, 9, 13,14, and 16 are rejected under 35 U.S.C. 102(b) as being anticipated by Porzilli.

Porzilli discloses the use of a speaker apparatus comprising a speaker(10), and an acoustic box(12) connected to the speaker, the box having a sound reflecting distal wall including a plurality of stepped portions with varying distances (claim 8) and mounting ledges (claims 6 and 14) of variable distances from the speaker(see figure 1).

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-5,7, 10-12, 17, 15, and 17-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over Porzilli in view Mitchell.

Porzilli does not disclose the use of a microprocessor mounted in the chassis.

Mitchell discloses the use of a chassis(12), a microprocessor(27) mounted in the chassis, an input coupled to provide input to the microprocessor, a storage coupled to the microprocessor, a video controller coupled to the microprocessor, a memory coupled to provide storage (see figures 1 and 3).

Mitchell also disclose the use of a snap fit disclosure using mounting and retention tabs(52)

It would have been obvious to one ordinary skill in the art at the time the invention was made to modify the chassis as taught by Porzilli with the microprocessor system as taught by Mitchell in order to provide a system for efficiently directing sound waves.

5. Any inquiry of a **general nature or relating to the status of this application or filed papers** should be directed to the **Group receptionist whose telephone number is (703) 308-0956.**
